

Electrical Requirements:

100 amps of AC Single Phase Power. Within 40 feet of the stage.

We have 50 feet of PRIMARY cable ending with either...
Bare tales, or CAMLOK connectors

We will supply bare tales. (2-hot, 1-neutral, 1-ground)
OR

Large CAMLOK – MALE connectors. (Black, Red, White, Green)

Customarily catering halls or hotels have their own electrician “tap us in” to their circuit breaker panel.

We carry a wide variety of circuit breakers with us to fit most common panels.

Another option is to rent a 50kw generator which we will “tap into” ourselves.

We have performed over 1,200 shows in 28 different states, in both big and small venues, and as of yet, everyone has been able to accommodate us without any problems.
